

Week-5

Aim: Write the PHP code to connect the registration form with the SQL database

Code:

insert.php

```
<?php
$username = $_POST['username'];
$password = $_POST['password'];
$gender = $_POST['gender'];
$email = $_POST['email'];
$phoneCode = $_POST['phoneCode'];
$phone = $_POST['phone'];
if (!empty($username) || !empty($password) || !empty($gender) ||
!empty($email) || !empty($phoneCode) || !empty($phone)) {
    $host = "localhost";
    $dbUsername = "root";
    $dbPassword = "";
    $dbname = "bakeryuser";
    //create connection
    $conn = new mysqli($host, $dbUsername, $dbPassword, $dbname);
    if (mysqli_connect_error()) {
        die('Connect Error('. mysqli_connect_errno().')'.
mysqli_connect_error());
    } else {
        $SELECT = "SELECT email From register Where email = ? Limit 1";
        $INSERT = "INSERT Into register (username, password, gender, email,
phoneCode, phone) values(?, ?, ?, ?, ?, ?)";
        //Prepare statement
        $stmt = $conn->prepare($SELECT);
        $stmt->bind_param("s", $email);
        $stmt->execute();
        $stmt->bind_result($email);
        $stmt->store_result();
        $stmt->store_result();
        $stmt->fetch();
        $rnum = $stmt->num_rows;
```

```

        if ($rnum==0) {
            $stmt->close();
            $stmt = $conn->prepare($INSERT);
            $stmt->bind_param("ssssi", $username, $password, $gender, $email,
$phoneCode, $phone);
            $stmt->execute();
            echo "New record inserted successfully";
        } else {
            echo "Someone already register using this email";
        }
        $stmt->close();
        $conn->close();
    }
}
else {
    echo "All field are required";
    die();
}
?>

```

Output:

The screenshot shows a web browser window with the address bar displaying "File | C:/Users/akank/Desktop/WebProgAssign/form.html". The page has a dark red header with the text "Bakery Management System". Below the header, the text "Come! Register With Us!" is displayed. The registration form consists of the following fields and controls:

- Name :** A text input field containing "Akankshya".
- Password :** A password input field with masked characters "*****".
- Gender :** Radio buttons for "Male" and "Female", with "Female" selected.
- Email :** A text input field containing "akankshya@gmail.com".
- Phone no :** A dropdown menu showing "+91" and a text input field containing "9876543210".
- Submit** button.

New record inserted sucessfully

Bakery Management System

Come! Register With Us!

Name :

Password :

Gender : ☐ Male ☒ Female

Email :

Phone no :
